The Aquatic Biogeochemistry Lab at the University of Central Florida is currently seeking applications from prospective M.S. or Ph.D. students for Fall 2024.

The ideal applicant would have:
- Research interest in applied ecosystem ecology and biogeochemistry
- B.S. or M.S. degree in Biology, Chemistry, Environmental Science, Soil Science, or a related field
- Experience working in soils, wetlands, and/or coastal ecosystems, and strong analytic laboratory skills
- Past research experience
- A competitive GPA

Join a vibrant research team making advancements in understanding soil carbon storage for natural climate mitigation and optimizing the nutrient removal potential of natural ecosystems.

Contact Lisa G. Chambers (lisa.chambers@ucf.edu) if interested. Applications are due Dec. 1, 2023. Positions are fully-funded with GTA and/or GRA support.
