FIU's Institute of Environment is now accepting applications to our Coastal Ecosystems Research Experience for Undergraduates (REU) Site program.

The Coastal Ecosystems REU program is a 10-week paid research fellowship located on the campuses of Florida International University in Miami, FL running from May 24, 2021 until July 30, 2021. This hands-on and immersive research opportunity supports students to develop an independent research project with Institute of Environment faculty and graduate student mentors.

Research opportunities in marine biology, aquatic chemistry, engineering, robotics, sustainability, computer science, botany, conservation and more are available!

Applications are due January 15, 2021.

Click here for more information.
Questions can be directed to Dr. Rita Teutonico.

ELIGIBILITY
- Must be U.S. citizens, U.S. nationals, or permanent residents of the United States;
- Must plan to be an enrolled undergraduate student for at least one semester after the summer program;
- Can be undergraduate students in any discipline/major related to the Institute of Environment's research areas;
- Should have completed at least two semesters of relevant coursework.

PROGRAM HIGHLIGHTS
