

2-year Postdoctoral Position – Ecosystem Biogeochemistry

University of Maryland, College Park MD

Collaborate with Drs. Margaret Palmer (aquatic ecologist) and Kate Tully (soil biogeochemist) on research related to carbon dynamics in natural and restored forest wetlands and/or agricultural systems experiencing saltwater intrusion. Individual has latitude to determine exact project, but the Palmer/Tully groups have a special interest in links between soil carbon storage, emissions, and hydrology.

Requirements: U.S. citizen, PhD completed in time to join UM team by August 2020

Interested? Send C.V. and names of 3 references to mpalmer@umd.edu and ktully@umd.edu

For more information on the groups see www.PalmerLab.umd.edu and www.agroecolab.org
